Homeowner Information

Thank you for your interest in installing a WMB-friendly garden at no cost to you. The "Your Monarch Butterfly Garden" program is sponsored by the A.L. Clinton Operating Foundation, a 501(c)(3) non-profit organization (not connected to the Bill, Hillary, and Chelsea Clinton Foundation). The installation is subject to the terms of an Agreement with the Foundation.

The program works like this:

1. Upon receipt of your signed Agreement, we will give your contact information to a licensed and insured landscaping service.

2. The landscaping service will contact you to make a appointment to meet with you at your property and design a garden with you. The configuration of the garden is flexible. For instance, you may

* allocate a specific part of your property for your Monarch Butterfly Garden,

* mix the Butterfly Garden plants among your existing garden plants, or

* put the Monarch Butterfly Garden plants in your own containers

The design is what you work out with the landscaper. The usual installation is 6 to 8 nectar plants and 6 to 8 host plants (i.e., the narrow-leaf milkweed plants where the Monarch Butterflies lay their eggs). For installations greater than this, the landscaping service will contact us for approval. Note: if the landscaper determines that the installation is infeasible or poses a danger to landscaper's employees, the landscaper will inform us.

3. All plants and materials will be supplied for your garden. If you desire that the landscaper install the plants on your property, please inform the landscaper when you make your appointment. The landscaping service may be able to install your Monarch Butterfly Garden on the first appointment, depending the availability of plants and labor. If not, the landscaper and you will schedule a second appointment.

4. The landscaper will visit your garden in a few weeks to see how the plants are doing. In the mean time, if you have any questions or concerns, you may contact the landscaping service.

5. The landscaper may provide small signs identifying the butterfly-friendly plants and a small, appropriate sign for your property facing the street to indicate that you have a Butterfly Garden.

6. The landscaping service will bill the Foundation for the plants and installation of the Butterfly Garden, so there is no cost to you.
